

Wanganella Wind Farm

Project update | August 2025

The Project

The proposed Wanganella Wind Farm (the Project) will host up to 105 wind turbines, with a generating capacity of up to 840 MW, and a Battery Energy Storage System (BESS) up to 600 MW.

Location

The Project is located in Wanganella, NSW (approximately 25 km north of Deniliquin) within the Edward River Council Local Government Area. The project is situated within the South West Renewable Energy Zone (REZ) and will intersect the proposed VNI West transmission line.

Equis has conducted initial feasibility studies, which indicate that the site conditions are suitable for developing, constructing and operating a wind farm and BESS facility.

Benefits

We expect the Project to provide New South Wales with affordable, clean, and reliable electricity to meet its future energy needs and create economic, social, and environmental benefits.

jobs

Generates up
to **840 MW**
of energy

**“The Wanganella Wind Farm is declared a State
Significant Development under the EP&A Act 1979”**

Planning

We are seeking a development approval under the NSW Environmental Planning and Assessment Act 1979 (the EP&A Act). A range of studies will be undertaken as part of the planning approval process to provide a comprehensive assessment of the social, environmental, and economic impacts of the Project.

Work to date

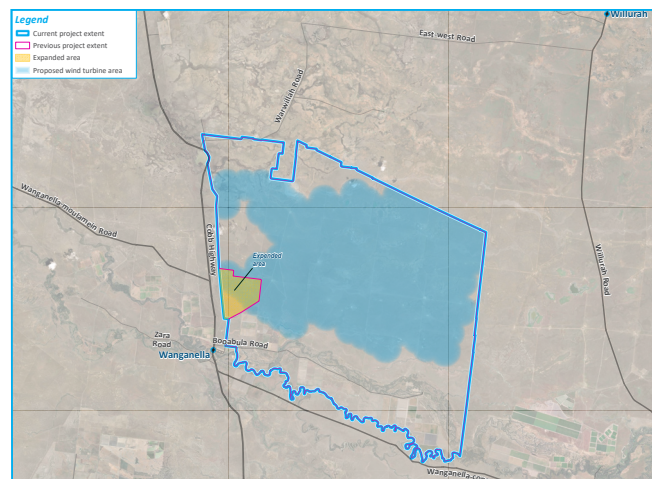

In late 2024 Equis engaged specialists to undertake a range of preliminary assessments to support the preparation of a Scoping Report (a report to provide the Minister for Planning and the Department of Planning, Housing and Infrastructure (DPHI) with information regarding the Project), and to provide a basis for further technical assessments that will form part of the Project's Environmental Impact Statement (EIS). These preliminary studies covered:

- Cultural Heritage
- Landscape and Visual
- Noise
- Biodiversity
- Social Impact

The Wanganella Wind Farm is declared a State Significant Development under the EP&A Act 1979 and the Planning Secretary's environmental assessment requirements were issued on 16 December 2024.

Current works

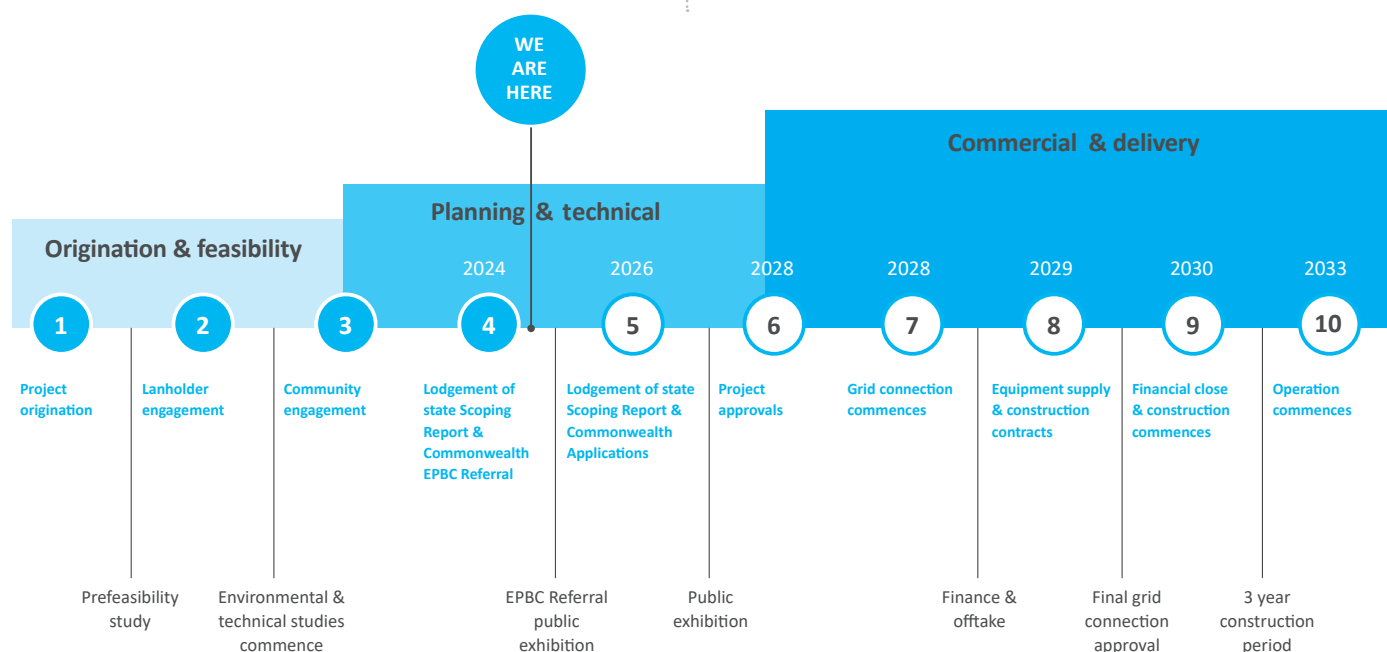

Equis is currently updating the project details to reflect a minor modification of the project boundary as is shown in the graphic.

Project status

We are in the early stages of the Project development and anticipate starting construction in 2030, and operations in 2033. The estimated timeline for the Project's lifecycle includes the following key phases:

Community Information Session

We held our first community information session on the 18th October 2024 at the Wanganella Town Hall. The community session held between 10am- 2pm, was well attended and provided an opportunity for:

- The local community to talk to our Project team members about our proposed wind farm, learn more about the Project and its potential impacts and benefits, and
- our team to listen to local stories, and to answer a lot of questions and learn about local opportunities and what is important to the community.

We thank the community for sharing their insights with us, for their hospitality and acknowledge the generosity and support of the Wanganella Hall Association, who worked with us to host a successful information session and lunch.

Upcoming work

Equis will consult with all relevant parties and preparing an Environmental Impact Statement (EIS) for submission to the Planning Secretary. The EIS will be placed on public exhibition following lodgement. The project will also be referred to the Environment minister under the Environment Protection and Biodiversity Conservation Act 1999.

Provide feedback

Email AUProjects@equis.com or phone 1800 161 249.

To learn more about our projects you can:

- Visit our [website](#)
- Register at [engagement hub](#) to follow our projects
- Attend a project information session.

We encourage you to follow our project by registering on our engagement hub. On the engagement hub you can provide feedback, subscribe for project updates, register as a supplier and register ideas for community benefits.

We will publish Project information on our engagement hub and website, including upcoming information sessions, Project updates, newsletters, and fact sheets.
